Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 8-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mizuno et al or Yoshikawa et al. Either reference discloses an annular body constructed of metal and coated with abrasive on either the inner peripheral edge or outer peripheral edge, but not both. On the other hand the examiner considers that in view of this, it would have been obvious to coat with abrasive both inner and outer peripheral edges of the same saw blade, for the purpose of facilitating the use of the blade in different cutting operations, thereby avoiding changing the blades to use one or the other depending on the particular cutting operation.

It is especially noted that the specification of the subject application does not indicate that applicant is the first to entirely coat an annular saw blade with the same adhesive coating. On the other hand, independent claims 8 and 13 would read on any ring saw blade having an inner core and THE SAME abrasive coating covering the entire blade, since the terms first abrasive coating and second abrasive coating do not require different coatings. For example, the terms first and second with regard to the abrasive coating could be read as indicating the position of the coating with regard to the blade (for example, inner and outer peripheries) as opposed to indicating different coatings.

3. Claims 1-7 are allowed.
